FULL PAPERS ACCEPTED TO BE PRESENTED
AND PUBLISHED AT ICEE 2012

TURKU, FINLAND / 30.7. - 3.8.2012

If you find errors on this list, please contact info@icee2012.fi

PRESENTATION TYPE: O = Oral presentation, P = Poster presentation

(Please contact info@icee2012.fi if you have questions or comments)

ID #	TYPE	Author(s)	Title
9	O	Desmond Adair and Martin Jaeger	On Moving from Structured Oral Assessments to Computer-Aided Assessments for Vocational Training
11	O	Martin Jaeger and Desmond Adair	A Student's Perception of Ethics during his Final Year Project "Ethics on a Construction Project" in the Middle East
15	O	Liisa Kairisto-Mertanen and Olli Mertanen	Innovation pedagogy – a new culture for education
16	O	Päivi Porras	Profiles of Engineering Students in Mathematics
19	O	Albert Albers, Toan Nguyen and Norbert Burkardt	Improving Hands-On Education by Introducing a Mechanical Components Model Suitcase
21	O	David Barbe	Residency Programs for Entrepreneurial Undergraduate Engineering Students
25	O	Aharon Gero	Outstanding Female High School Pupils' Perception of Electrical Engineering – What has Changed?
33	O	Jorge de la Torre, Jose Luis Saorin, Norena Martín and Manuel Contero	Digital Tangibles Interfaces as an alternative of Tangible Models for its use in a Virtual Learning Environment in Engineering
34	O	Tony Eng, Rudolph Mitchell and Sylvia Barsion	Assessment of Short-Term Post-Impact of Students' Learning Experience in an Oral Communication Course at MIT for EECS Majors
35	O	Janne Roslöf	Lecturers' Perspectives on the Educational Background of Engineering Students
37	O	Mario Leindl, Eduard Oberaigner and Marianne Mataln	A modern course in vibration of rods and beams
39	O	Dante Augusto Barone, Marcia Cançado Figueiredo, Gabriel Lamb Wink and Lucas Jardim	New challenges for engineers: design and implementation of a mobile system dedicated to improve oral health conditions
40	O	Jorma Nevaranta	Teaching Strategy as a Modular Service Product in Comprehensive Course Development
43	O	Catherine Skokan	Analysis of the Impact of Placing Engineering, Mathematics, and Computer Science Graduate Students in teh K-12 Classroom
47	P	Clement Onime, James Uhomoibhi and Sandro Radicella	Issues of infrastructure and capacity building for enhancing Engineering Education in Developing Nations: A focus on Africa
48	O	David Pundak and Arie Maharshak	Engineering Students' Dilemma – Work vs. Loan
49	O	David Pundak, Orit Herscovitz and Miri Schaham	Engineering Students - Reading Habits and Fragile Knowledge

50	O	*Juha Kontio and Motomu Takeshige*	**Enhancing cultural awareness and mobility between Japan and Finland**
51	O	*Nikolay Mikhaylov*	**Virtual Development Lab: Concept, Implementation, Evaluation**
52	O	*Carlos Carbonell Carrera and Jose Luis Saorín*	**Spatial Data Infrastructure as learning environments for spatial skills development in engineering education**
53	O	*Anna Friesel*	**Experiences with exchange students at the Copenhagen University College of Engineering working in international project teams**
54	O	*Anouk Desjardins, Évelyne Doré, Raymond Desjardins and Dominique Chassé*	**Technical Writing Course Designed for the Realities of an Engineer**
55	O	*Josef Rojter*	**Contextualizing Fundamental Sciences into Engineering Curriculum**
58	O	*Seppo Niemi, Pekka Nousiainen and Mika Laurén*	**Skilled engineers through internal combustion engine research**
59	O	*Antti Hakkala and Seppo Virtanen*	**University-Industry Collaboration in Network Security Education for Engineering Students**
60	O	*Alpo Salmisto*	**Case Study: The Progressive Inquiry Learning Method in Course Real Estate Business and Management**
61	O	*Taru Penttilä, Liisa Kairisto-Mertanen and Adam Jagiello-Rusilowski*	**Validating social competencies as learning outcomes of innovation pedagogy –experiences in Finland and Poland**
62	O	*Mika Jokinen, Karlo Villa and Minna Tuovinen*	**Towards self-steered studies by working in R&D projects**
65	O	*Josef Rojter*	**Peeling an Onion: Marketing Engineering Courses Through New Course Pedagogy?**
66	O	*Tokio Abe*	**A Curriculum Improvement of MIS Course in College**
67	O	*Tapani Ojanperä*	**Enhancing Student Motivation by means of Software Programming Projects**
70	O	*Michele Angelo, Nilton Dantas, Angelo Loula, Matheus Pires and Angelo Duarte*	**Entrepreneurship in a Curriculum Redesign of Computer Engineering**
71	O	*Hanna Hänninen, Taina Hovinen and Jouko Vihanto*	**Chemical Analysis Service: Learning in Projects**
76	O	*Olli Mäkinen and Jyri Naarmala*	**The Age of Information and De Facto Ethics**
78	O	*Jaana Holvikivi*	**From theory to practice: adapting the engineering approach**
79	O	*Hans Schjær-Jacobsen, Imad Abou-Hayt, David Ashworth, Marc Podzimski Jensen and Mads Peter Schreiber*	**Industrial Design as an Innovative Element in Engineering Education**
82	O	*Elena Trotskovsky, Nissim Sabag, Shlomo Waks and Orit Hazzan*	**Student Achievements in Solving Problems Using Models in Electronics**
83	O	*Elina Kontio, Nina Lehtinen and Juha Kontio*	**A Study on Health Informatics Education in Finland**
85	P	*Eduardo Montero, María Jesús González-Fernández, Fernando Aguilar, Fatima E. M. Alaoui and Jesús Marcos García-Alonso*	**The use of streaming video to support engineering student's learning in energy topics**
86	P	*Youngtae Lee, Hanwoo Kim and Jinsoek Park*	**A Study on the Development of Program Outcomes Assessment tool using Reflection Journal**

87	O	*Chun-Ming Huang, Chih-Chyau Yang, Yi-Jun Liu, Chun-Chieh Chiu, Chun-Chieh Chu, Wei-De Chien, Yen-Chun Lu, Hung-Lieh Chen, Chun-Pin Lin and Chien-Ming Wu*	**A Heterogeneous Integrated System and Prototyping Platform for Taiwan Academia**
88	P	*Tony Wahlroos, Jarno Pusa, Anna Sulkakoski and Niina Punelpuro*	**The lab of courage: student participation in business projects**
89	O	*Tony Wahlroos, Juha Nurmio, Anne Norström and Jukka Kaitaranta*	**SUSBIO – developing the biogas process for future engineers**
90	O	*George Gibbon*	**The "Knows" and "Doing" in Engineering Education**
91	O	*Osmo Eerola*	**"My best course in engineering" - Developing a course in project planning and requirements engineering for undergraduate students**
92	O	*Claudia Daems*	**A Bridge between Engineering and Language Learning: Automation and German in an Online Course**
93	O	*Riku Haavisto, Johannes Holvitie, Erkki Kaila, Teemu Rajala, Mikko-Jussi Laakso and Tapio Salakoski*	**Designing a game mode for online learning environment**
94	O	*Johannes Holvitie, Riku Haavisto, Erkki Kaila, Teemu Rajala, Mikko-Jussi Laakso and Tapio Salakoski*	**Electronic exams with automatically assessed exercises**
95	O	*Johannes Holvitie, Riku Haavisto, Teemu Rajala, Erkki Kaila, Mikko-Jussi Laakso and Tapio Salakoski*	**A Robot exercise for learning programming concepts**
96	P	*Annika Brandt, Elina Palonen, Ville-Veikko Mäkelä, Juhani Soini, Tony Wahlroos and Rina Wahlroos*	**Molecular diagnostics laboratory (MDL) – collaboration between students and SMEs**
97	O	*GK Suraishkumar*	**Active Learning through Video Lectures**
104	O	*Peter Bofah and Mohamed Chouikha*	**A Novel Approach to Introduce Research in Undergraduate Engineering Curriculum**
106	O	*Ibibia Dabipi, Christopher Hartman and J. Bryan Burrows-McElwain*	**Design of a Picavet System that Supports a Remotely Controlled Pan and Tilt Digital Camera Equipment**
108	P	*J. Bryan Burrows-McElwain, I.K. Dabipi and Christopher Hartman*	**Integrating Human Factors Research into Undergraduate Coursework in Aerospace/Aviation: A Case Study in Pilot Cockpit Distraction by a Portable Electronic Device (PED)**
110	O	*María Consuelo Sáiz-Manzanares, María Jesús González-Fernández, Eduardo Montero, Fernando Aguilar and José Antonio Barón*	**Metacognitive knowing and solving problem: Case study on solving-problem in engineering thermodynamics**
111	O	*Kadri Umbleja, Vello Kukk, Martin Jaanus, Andres Udal and Boris Gordon*	**Analyzes of Competence Based Approach to Learning**
113	O	*Jennifer Czocher*	**Mathematical Modeling and Engineering Majors**
115	P	*Irina Belinskaya, Elena Ovchinnikova, Alexander Kartoshkin and Valeriy Belyakov*	**Ecological aspects of Russian agricultural engineering education**

116	O	*Anne Donnelly, Sandra Russo, Nikki Kernaghan, Samesha Barnes and Jane Jacobi*	**SEAGEP science and engineering in the global context project and assessment of its effects**
117	O	*Jarkko Paavola*	**Framework for Integration of Teaching and R&D in BSc Level Education - Case study on challenging long-term R&D effort**
119	O	*Dan Zhang, Laurie Cuthbert, Yashu Ying, Eleanor Pritchard and Steve Ketteridge*	**Students' Perspectives on Teamwork Learning in Engineering Education in China**
120	O	*Joseph Cocozza and Diana Sabogal*	**Establishing a Tradition of Mentoring**
123	P	*Insook Kim, Dongchoul Kim and Juho Kim*	**Effective Teaching Methods for Capstone Design Courses : Case study**
124	O	*Ananda Maiti, Subhasis Mahata and Chinmay K Maiti*	**Low-Cost Remote Semiconductor Devices Laboratory with NI Switch**
126	P	*Chandrasekar V. Chandra, Jaan Praks, Ari Sihvola, Tuija Pulkkinen and Dmitri Moisseev*	**Radar Engineering and Radar Meteorology Education partnership between Colorado State University, Aalto University, and University of Helsinki: An experiment in content delivery and pedagogy**
128	O	*Reijo Asp and Kristiina Meltovaara*	**Enhancing student participation in engineering education: an alternative approach to practical work sessions**
130	O	*Merja Mäkelä and Maija San*	**Energy engineers through distance learning - Cooperative teaching and learning approaches**
131	O	*Azizan Zainal Abidin, Rosetta Ziegler and Raija Tuohi*	**Discovering the learning styles of engineering and non-engineering students**
133	O	*Tommi Metso and Kristiina Meltovaara*	**Facilitating & enhancing innovation competences and student involvement: an example of introducing real life problem solving as well as technologies to teaching product development and planning**
134	O	*Patric Granholm, Aulikki Holma, Pia Lindgren and Olli Mäkinen*	**The Cosmos Project – an attempt to increase the employability of foreign students**
135	–	*Tarja Karjalainen and Tanja Korhonen*	**Information Systems Proficiency Area**
137	O	*Radim Farana, David Fojtík and Marek Babiuch*	**Team Education Support of the Technical Subjects at the Faculty of Mechanical Engineering**
138	P	*Kari Lindström and Kristiina Meltovaara*	**A strategic partnership: developing a new approach to University-Industry collaboration**
139	O	*Marianne Mataln, Mario Leindl and Eduard R. Oberaigner*	**Employment of OpenFOAM in Teaching and Research**
140	O	*Peter Willmot, Michael Bramhall and Keith Radley*	**An academic's toolkit for innovative project reporting using audio visual media.**
141	O	*Patrick Purcell*	**Innovations in the Civil Engineering curriculum at University College Dublin**
142	O	*Tamás Molnár*	**Parzival meets modern architecture**
144	O	*Sebastien Lafond and Cecilia Brunel*	**Double Master Degree Programme: Enhancing Multicultural Engineering and Mobility between France and Finland**
145	P	*Teijo Lahtinen, Arttu Salmela and Henri Koukka*	**Enhancing Engineering Education and University-Industry Collaboration by Simulation Tools**
146	O	*Tero Reunanen and Riitta Windahl*	**Rocketing Professional Competence of Engineering Students at TUAS (Turku University of Applied Sciences)**
149	O	*Maria Charalampidou, Spyridon Mouroutsos and George Pavlidis*	**Learning advanced telemetry and telecontrol systems in the laboratory**

150	O	*Tero Reunanen, Juha Valtanen and Riitta Windahl*	**Evolutionary Approach to Modern Creative Engineering Studies in Turku University of Applied Sciences**
151	O	*Kalliopi Skarli*	**Mapping out Global Competences: a comparative case study**
152	O	*Maria Rostasova, Tatiana Corejova and Alena Chrenkova*	**Creation of Quality Assurance in Lifelong Learning in the Slovak Republic**
154	O	*Jose Teixeira and Joni Salminen*	**Open-Source as Enabler of Entrepreneurship Ambitions among Engineering Students – A Study Involving 20 Finnish Startups**
155	O	*Helena Mälkki and Jukka V. Paatero*	**Promoting pedagogical skills and a more holistic view of energy engineering education**
156	P	*Kristiina Meltovaara and Juha Leimu*	**Facilitating innovation competences: Integrating business and engineering**
157	O	*Svein Thore Hagen and Harald Hasleberg*	**Entrepreneurship in higher education, a successful program at Telemark University College**
160	O	*James McClellan and Gregory Krudysz*	**Concept-Based Tutoring System for on-Line Problem Centered Learning**
161	O	*Dag Wedelin and Tom Adawi*	**Bridging theory and practice: An inquiry-based course in mathematical modelling**
162	O	*Anja Hänninen, Tomi Ylikorpi and Aarne Halme*	**Best Practices for Efficient Student Tutoring**
165	O	*Jiri Jan*	**Differing Concepts of Biomedical Engineering Education**
166	O	*Daniel Bailey and Jonathan Adams*	**Northants Engineering Training Partnership (NETP), a model for sustainable, Industry - University Engagement**
167	P	*Martin Lamos and Jiri Jan*	**Analysis of simultaneous EEG/fMRI data - teaching of doctoral students via research**
168	O	*Hamadou Saliah-Hassane, Maarouf Saad and Willie K. Ofosu*	**Smart Educational Learning Devices for Online Laboratories**
171	O	*Markus Forstén, Ari Putkonen, Osmo Eerola and Tristan Robinet*	**Learning Strategic Management Skills with Business Simulation Game**
173	O	*Ville Taajamaa and Kati Vilonen*	**The future of engineering education?**
174	O	*Roelof van Silfhout, Ian Cotton, Bruce Grieve, Alexander Lanzon, Alasdair Renfrew and Andrew Gibson*	**Introduction of student initiated and themed multi-student projects**
175	O	*Louis Nadelson, Anne Seifert, Sandra Nadelson and Melinda Hamilton*	**Teaching By Design: Preparing K-12 Teachers to Use Engineering Design across the Curriculum**
176	O	*Walnorio Ferreira, Diogo Rossi, Vitor Gonçalves and Augusto Badke-Neto*	**Pedagogical approach for the Structural Stability**
177	O	*Luciana Coelho, Jose Grimoni and Osvaldo Nakao*	**Comparison of Graduate Courses in Teacher Training Schools of Engineering**
178	O	*Nancy Healy and Joyce Allen*	**Workforce Development in Nanoscale Science and Engineering - Training Teachers to Educate Future Nanoscale Scientists and Engineers**
179	O	*Nancy Healy and Lynn Rathbun*	**Developing Globally Aware Scientists and Engineers in Nanoscale Science and Engineering**
184	O	*Lise Busk Kofoed and M. S. Stachowicz*	**Assessment of Students Project – Numbers, Letters, Words.**
185	O	*Larissa Fradkin*	**Issues surrounding teaching calculus to engineering freshers**
190	O	*Sonya Coleman, Anne Hinds, Eric Nichols and Heather Sayers*	**Improving First Year Retention in Computer Science by Introducing Programming in Schools**

192	O	*Timo Poranen, Toni Pippola, Matti Vuori, Ville Kairamo and Jarmo Tuominiemi*	**Teaching innovation projects in universities at Tampere**
193	P	*Clara de Oliveira*	**Pedagogical Analysis from Aalto University School of Chemical Technology at Highlights of mOT Integrative Educational Methodology**
194	O	*Outi Laitinen, Seppo Kuikka and Pekka Alho*	**The automation engineering students' knowledge development in a simulated work environment**
195	O	*James Uhomoibhi and Margaret Ross*	**Engineering Professional Development and Economic Growth: Issues of Collaboration between Academic, Industry and Professional Organisations for the Benefit of Employment and Sustainability**
198	O	*Juha Kontio, Patric Granholm, Heikki Valmu, Janne Mäntykoski, Karl Kruusamäe, Marija Aukstuoliene, Loreta Savulioniene, Peter Munkebo Hussmann and Kristina Edström*	**Supporting Programme Development with Self- and Cross-evaluations – Results from an International Quality Assurance Project**
200	O	*Lars Reng*	**Development of an Artificial Intelligence Programming Course and Unity3d Based Framework to Motivate Learning in Artistic Minded Students**
202	O	*Marcos Borges, Daiane Rampinelli, Victor Bicalho and Ciro Sobrinho*	**Project-based learning: the SAE Aero Design experience**
204	O	*Marcos Antonio de Carvalho Guedes, Felipe Serafim Albaladejo, Armando Antonio Maria Laganá and João Francisco Justo Filho*	**Didactic kit for the study of intake air system in internal combustion engine**
205	O	*Emmanuel Glakpe and Selete Avoke*	**A Comparative Analysis of the Pre-Engineering Curricula of Three International Educational Systems**
207	O	*Jenna Tague, Jennifer Czocher and Gregory Baker*	**Mathematical Literacy for Engineering Majors**
214	O	*R. Keith Stanfill and Susannah Howe*	**Roughly Right and Fast: Back-of-the-envelope Calculations for Estimation, Problem Bounding, and Design Decisions**
215	O	*Enrique Ballester Sarrias, Manuel Gasch Salvador, Laura Contat Rodrigo, Isabel Gasch Molina, Maria Dolores Navarro Mas and Luis Manuel Sanchez Ruiz*	**Implementation of a new teaching-learning system in the BEng degree in Mechanical Engineering towards its EHEA adaptation**
216	O	*Enrique Ballester Sarrias, Marina Puyuelo Cazorla, Laura Contat Rodrigo, Manuel Gasch Salvador and Luis M. Sanchez Ruiz*	**Comparative analysis of students performance in pre-EHEA and EHEA structured BEng degrees in Industrial Design Engineering**
218	O	*Pasi Rajala and Matti Syrjälä*	**Innovations to product, co-operation between Innotools and Saimaa University of Applied Sciences**
220	O	*Enrique Ballester Sarrias, Laura Contat Rodrigo, Juan Antonio Monsoriu Serra and Luis M. Sanchez Ruiz*	**E-learning: contributions from the School of Design Engineering ETSID at Valencia (Spain)**
221	O	*Luis M. Sanchez Ruiz, José-A. Moraño and M.-Dolores Roselló*	**Fitting Mathematics to EHEA in Aerospace Engineering at the School of Design Engineering ETSID in Valencia (Spain)**
224	P	*Piotr Klosowski*	**Functioning and Development of Distance Education at Silesian University of Technology**

225	O	*Jouko Lehtonen and Meiju Räsänen*	**Inventions as an environment for learning**
226	O	*Teemu Santanen and Sirpa Sandelin*	**Study course cooperation model for enterprises and SAMK - Case Offshore**
227	P	*He Lingsong, Wu Bo and Zhou Liping*	**Mechanical Engineering Practice Educational Center Operating by both University and Industry**
229	O	*Eusebio Jiménez López, Víctor Martínez Molina, Cristhian Ramón Uzeta Obregón, Saúl René Ontiveros Moroyoqui, Luis Andrés García Velázquez, Gabriel Luna Sandoval, Luciano Vela Martínez and Juan Delfín Vázquez*	**About a systematization of the design process of original equipment**
230	O	*Petri Sainio and Seppo Virtanen*	**Structured Learning Journal Based Method for Lecture Courses in Engineering Education**
233	O	*Breno Carmo and Renata Pontes*	**Web 2.0 and Collaborative Learning: An Application on Industrial Engineering Course**
236	O	*Phil Picton*	**Teaching ultrasonics using spreadsheets**
237	O	*Riikka Kulmala and Marika Säisä*	**Promoting knowledge sharing and innovativeness in e-learning environment**
238	O	*Giuliano Donzellini and Domenico Ponta*	**Teaching Digital Design in the FPGA age**
239	P	*Ricardo de Andrade, Marcos Antonio de Carvalho Guedes, Armando Antonio Maria Laganá, Kleber Nogueira Hodel and Joao Francisco Justo Filho*	**Didactic kit for the study of CAN bus**
240	O	*Marcelle Herescu, Edson L. Pereira, Giuliano S. Olguin and Patrícia H. L. S. Matai*	**Initiatives to promote Science & Technology careers and their impact on IT's sector and on developing countries**
241	O	*Vinícius A. A. Melo, Geraldo M. Lopes, Giuliano S. Olguin and Patrícia H. L. S. Matai*	**Information Technology in the computer engineering curriculum: an analysis among undergraduate institutions**
244	O	*Klaus Wuersig*	**Selection of appropriate Programming Languages for Engineering Applications**
245	P	*Vojislav Ilic*	**Tesla Turbine as a Student Learning Tool**
246	O	*Mika Luimula and Janne Roslöf*	**Innovation Competences in Game Technology Education**
249	O	*Jyrki Laitinen and Timo Pieskä*	**Novel approach to organize higher education in regional units**
252	O	*Tatiana Corejova and Juraj Kavecky*	**Education to the Technology Entrepreneurship in Engineering Study Programs in Slovak Republic**
254	O	*Jim Morgan, Robert Caparo and Mary Margaret Caparo*	**Science, Technology, Engineering and Mathematics (STEM) Education: Methods to Improve PSAT Scores Using a STEM Focus**
255	O	*Thyagarajan Srinivasan and David Carey*	**A Course in Instrumentation Automation**
256	O	*Sakari Pieskä and Mika Luimula*	**How to Promote Innovations through Applied Research in Collaboration with SMEs?**
261	O	*M. Taghi Mostafavi*	**Engineering the Science and Engineering Education**
263	O	*Galeno José de Sena, Marco Aurélio Alvarenga Monteiro, Leonardo Mesquita, Maria Cecília F. P. Santos Zanardi, Fábio Esteves da Silva, Carlos Eduardo da Silva Amorim*	**Engineering Students Involved in Activities to Motivate High School Students for Engineering Courses**

269	O	*Jerker Björkqvist, Luigia Petre, Karl Rönnholm and Dragos Truscan*	**Integrating Innovation Driving Activities in an Master Level Project Course**
270	O	*Vladimir Nikulin and Victor Skormin*	**Worldwide-accessible 1.25 Gbps advanced laser communication laboratory**
271	O	*Adelson Carvalho, Dante Barone and Milton Zaro*	**MECATAS – Teaching and Learning Model for Control and Automation Engineering based on the Meaningful Learning Theory**
272	O	*Sally Organ and Carol Morris*	**Open and Distance Learning for Engineering; Opportunities and Challenges**
